Program Results and Effect:

Vision loss is the second most feared affliction in this country, according to Gallup surveys. Cancer is the first. The negative backlash of this fear that virtually permeates our society is the idea that, "If you can't see, you can't do, or belong . . . blind people are not able to take care of themselves . . . blind people can't work, travel, maintain a household, etc." In this environment, the likelihood that a person will be independent, both socially and economically is very minimal without intervention and specialized training. The Commission for the Blind and Visually Impaired fulfills this need in Idaho. Our mission is "To promote choices and empowerment for people who are legally blind, functionally blind, or in danger of legal blindness, and to assist them to achieve employment, independence, and integration into the work place and the community." We accomplish this through a variety of programs directed to the specific needs and goals of the individual. These programs are goal-oriented. For example, a client working toward an employment goal of computer programmer. Intermediate objectives to reach that goal include: 1) learning alternative skills for blindness such as Braille, cane travel, cooking, cleaning, money management, and basic computer with speech access and use of remaining vision; 2) basic job skills and work ethics; 3) preparation and attendance at college for a degree, and 4) obtaining the first permanent job and working with the employer to make job site modifications and obtain adaptive equipment when needed. At this point, since the goal is achieved, the person's case file is closed. Follow-up after closure is for two purposes--first, to determine the client's satisfaction with ICBVI service and second, to ensure job retention.
